Countries worked in include: UK Ireland, Portugal, Norway, France, Saudi Arabia, UAE, Oman, India, Malaysia and Australia.

## Our clients include:

- CRH / Tarmac
- Holcim / Aggregate Industries
- Heidelberg Cement / Hanson
- Breedon Aggregates
- Tata Steel
- Gallagher Group
- Simec Mining (Australia)
- BHP Biliton (Australia)
- Anglo American (Australia)
- Stevin Rock (UAE)
- Yashganga Stone (India)
- Montecarlo (India)
- Pegop (Portugal)
- Boral (Australia)

## Working with some of the leading organisations in mineral processing

# World leaders in dust suppression

---

Since 2004, Best-Chem has been at the forefront of providing bespoke Dust Suppression Solutions to the bulk mineral processing and handling industries.

During that time, we have developed considerable experience and an excellent track record of delivering innovative, effective and customised solutions for controlling fugitive dust emissions.

The Best-Chem team draws upon expertise in the fields of chemistry, engineering and mineral handling to provide a complete solution that meets, and often exceeds, the needs of the client.

As pioneers of Foam Dust Suppression Technology, we have developed leading application technology and dust suppression agents, that provide a highly effective tool for combatting the longstanding problem of controlling harmful dust.

The range of Best-Chem solutions also includes: high pressure misting systems, road sprinkler systems, stockyard sprinklers, rail car topping systems and numerous one-off solutions.

Fugitive dust causes sites a whole host of costly issues and Best-Chem is committed to working with our clients to resolve these matters and provide a better working environment.

# Our services

---

Best-Chem offer a Complete Solution to your Dust Suppression needs.

**Survey** \ Best-Chem will carry out initial desk reviews and detailed site surveys for clients both in the UK and around the world. Each application is unique and will present different challenges which need to be clearly identified and understood.

**Design** \ We have designed systems for facilities in various industries, processing as little as 0.1m to over 30 million tons per year.

**Build** \ A key advantage of Best-Chem is that we manufacture both the equipment and the chemicals chemicals in-house, in our facility in the UK. We are continually engaged in R&D activities and place a strong emphasis on product quality.

**Install** \ Our experienced team of installation engineers are trained to work safely and efficiently at all times, to deliver the project with minimal impact on plant operations and productivity.

**Maintain** \ Key to the success of any installation is regular service and maintenance. Following commissioning, we conduct product training with site personnel and going forwards we can offer tailored service and maintenance packages.

# Our products

---

## Foam Dust Suppression Systems.

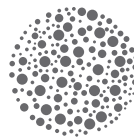

Our core product and service is the design, supply and installation of comprehensive Foam Dust Suppression Systems.

- Eliminates 90% of fugitive dust
- Ultra low moisture addition
- Fully automated
- Proven track record
- Requires little maintenance
- Quick to install

## Additional products and services include:

- High Pressure Misting / Fogging Systems
- Sprinkler Systems
- Haul Road Chemicals
- Stockpile Sealants
- Rail Wagon Treatment
